⁵⁵ Product information

For more than 55 years USM has been manufacturing modular furniture with the aim of adapting the product to the evolving needs of the customer. The USM system comprises of a chrome-plated brass ball, chromed steel tubes which connect to the ball forming a stable framework and powder coated metal panels mounted between the tubes.

In 2011 USM entered into a business co-operation to offer airports the combination of a product that fulfills the diversified demand of user together with the vision and expertise of planners and architects. USM Airportsystems has meanwhile completed projects for more than 50 airports and national airport authorities worldwide.

With the input of the customer on the requested function of the unit, the CUTE integration and the space available, USM Airportsystems designs bespoke furniture for all touchpoints in airports.

USM concept

1 Modular

If the space, situation or desired use of the unit changes, the modules can be disassembled and reconstructed.

2 Sustainable

The longer a product can be used, the more economical it is and the less impact it has on the environment. USM Modular Furniture was the first company in Europe to achieve the Greenguard certificate allowing it to qualify for LEED rating. It also holds the Cradle to Cradle certificate.

3 Robust

Steel panels combined with a virtually indestructible polished chrome frame.

4 Flexible

Units can be dismantled and reconfigured at any time. They can be organized individually, extended using new elements or combined with parts from decades ago without a visible difference. If a scanner is updated only one panel needs replacing.

5 Zero fire load

Confirmed by Building Material Test Certificate B1.

6 Cost and time efficient

Alterations or rebuilding can be undertaken on site and by the owners themselves.

7 Versatile

The steel panels can be replaced by wood, HPL, stone or glass.

8 A thing of beauty!

Since 2001 USM Modular Furniture Haller is permanently exhibited in The Museum of Modern Art (MoMA) in New York City.

Check - in

Seated Standing Mobile

Seated

Get seated at the check-in desk!

This seated module allows for the integration of all widths of conveyor belts and automated baggage drop-off systems.

Multifunctional work center

The design includes a sunken shelf for the monitor, one printer extension shelf and a lockable drop-down door for the CPU and general storage. The desk is configured around the CUTE equipment provided by the customer. Should the equipment not fit, larger tubes and panels can be used.

Colour accents

Using the 14 standard USM colours, panels can be combined to reflect the airport or airline CI. Alternatively airline logos using magnetic foil can be attached to the front of the panels.

Bag shelf

This configuration includes a passenger bag-shelf on the 750 mm wide panels. These can however be mounted around the entire unit.

Customized cut-outs

Using precision cut-outs, baggage displays, control panels and emergency baggage stop buttons can be mounted behind the metal, glass or HPL panels.

Standing

Customise your check-in desks!

A USM check-in desk doesn't have a front or a back, It should be aesthetically pleasing for both user and passenger. The user has a clean and tidy workspace with each piece of CUTE equipment housed in a specifically designed compartment. Printer paper, baggage tag rolls and boarding passes all have a designated space. Modules are only added if needed allowing desks to be minimal in size freeing up space for passengers.

Barrier-free

Should the space be available, a section reduced in height allows for wheelchair accessible options.

Standing

Adapting the desk over time

This module allows the user to stand at the check-in desk. Customers can start with the basic module and retrofit the added compartments in figure three and four at a later date. Alternatively compartments can be removed should the function no longer be needed.

2 Basic model

The basic module has an extension shelf for the keyboard, a lockable drawer, an extension shelf for the printer and a lockable drop-down door for the CPU.

3 Extension

Figure 3 allows for added storage space and another extension drawer for a printer. The lower compartment can be left open or a door added if required.

4 Wheelchair accessibility

An added section for wheelchair accessibility allows for the easy exchange between user and passenger.

Standing Mobile

Roll in the check-in desks!

A combination of standing and mobile check-in desks enables the airport or airline to immediately react to an increase in passenger flows.

Hardware intergration
This model displays integrated monitor arms and height adjustable keyboard trays. It has one extension shelf for printers and one lockable drop-down door for the CPU.

Casters or glides?
Mobile solutions are offered in all different size variations on hard or soft casters depending on the floor type, with or without locks and double casters.

Product specification

Boarding pass control

Boarding

Fulfilling customer needs

A boarding pass control desk can vary between a small mobile unit where the passenger scans a boarding pass to a 360° transfer service point.

↑ **Multifunctional**
This unit combines an information desk with a boarding pass control counter. It serves as the last touchpoint before the passenger moves into the airport security area.

Boarding

Safety standards

Safety tempered glass can be added or removed depending on changing safety standards.

- 9 Stand alone
A minimal approach with integrated scanners can be sufficient.
- 10 Mix and match
The Haller modular furniture system can be matched to the dimensions of a USM classic table.
- 11 Full circle
This 360° version has two magnetic doors and ample USM Haller storage space. The doors can be a combination of drop-down, extension or flip-up doors depending on the use.

Angled shelf with Haller E illumination from the front

Safety tempered glass

Integrated flat screen support arm using VESA standard with a swivel- type spherical joint. For screens up to 12 kg

Stand alone or integrated scanner

Lockable drop-down door for central processing unit with perforated floor panel including cable cut out enabling air circulation in CPU storage area

↑ Recharge
The integration of Haller E enables lighting at the front of the unit. A USB port positioned on the user side allows for easy charging of devices.

Security screening

Security screening

Reinforced working surface

Security screening furniture is reinforced with a brushed stainless steel surface enclosing a wooden insert and attached to a USM metal panel. All units can be modified in size to fit the surrounding.

↑ **Hand luggage screening**
This series is comprised of a recheck console with an integrated monitor and keyboard post. Explosive Trace Detection cabinets and re-vest tables. Using lockable single or double casters, glides, a pull handle and a variation of lockable doors, the line can be modified to fit the requirements of the user.

Security screening

Explosive Trace Detection cabinets

ETD cabinets are designed for the ETD unit to sit on top of the cabinet during use and to be placed inside the cabinet behind a lockable extension drawer when not in use. The lower compartment can be equipped with a battery pack to charge the ETD unit.

↑ Re-vest tables
Available in single and double units, on glides or casters, and with lockable drop-down doors.

Passport control

Passport control

↑
Reinforced casters
Often required for non-Schengen flight, the desk has been equipped with reinforced double casters allowing the units to be used at various gates around the airport

Gate counter

One lane Two lane Mobile

One lane

Modularity at its best!

The size of the gate counter tends to reflect the size of the aircraft being boarded. USM caters for every eventuality from short to long haul flights with one lane to four lane gate counters or more.

- 24 **Basic model**
The simplified version of a one lane gate counter with a scanner ledge, two extension shelves and a lockable drop-down door.
- 25 **Scanner integration**
A further example of a gate counter where the scanner can be integrated into the scanner box.
- 26 **More storage**
Here the scanner can be integrated and the compartments below equipped with doors for extra storage or an added printer extension drawer.
- 27 **Seat change**
The scanner box has been extended for an additional printer for seat changes.
- 28 **Trash compartment**
The scanner box can be extended to the floor for further storage space and a trash compartment.

↑ **Build-on or integrate!**
All desks can be equipped with safety tempered glass or Plexiglas as a security shield, integrated monitor arms, height adjustable keyboards, and cut-outs for the integration of intercoms and telephones.

Two lane or more

Retrofit

If, at a later date, the airport or airline wishes to divide the counter into two separate desks or alternatively, add a third work position, the parts can be ordered and retrofitted.

29 Electricity source
Some airports require the counters to source electricity from the ceiling and others from a floor tank. Each desk can accomodate either eventuality using an electricity post running from above directly into the desk or through shortened panels at the bottom of the desk.

30 Scanner boxes
The added scanner boxes on the left and right allow for a stand alone or integrated scanner.

31 Seat change
By extending the scanner box, an additional stand alone seat change printer can be used.

32 Coat rack
The additional side compartments allow for trash or a coat rack.

33 Infinitely adjustable
The middle section can be ordered at the onset or at a later date allowing the desk to be reconfigured into however many work positions are required.

Mobile

Help is at hand!

Mobile counters are often used as a fallback solution in case of increased passenger flows. Any desk configured on page 15 can be converted into a mobile unit. Cut-outs in the metal panels with mounting sets allow for the integration of biometric facial recognition scanners, height adjustable monitors and keyboard trays.

34-36 Small and practical

The smallest mobile gate solution can house a keyboard, boarding pass and baggage tag printers, CPU and a stand alone or integrated scanner.

37-39 Larger and practical!

This wider unit provides space for a height adjustable monitor and keyboard, 3 printers, an integrated or stand alone boarding pass scanner, intercom and telephone.

40 Changing needs

The double unit can include all of the aforementioned for two work spaces and a further passenger list printer. If, at some stage, it is decided to make the mobile desks a permanent solution, the casters can be removed and replaced with glides.

Informa- tion desk

Information desk

First impressions

An information desk reflects the efficiency and professionalism of an airport. A clutter-free design with endless storage, this unit can be extended or reduced in width depending on the airport requirements. This type of configuration is also suitable for car rental or hotel informations desks. USM Haller metal panel colour combinations and logos can be added for corporate design purposes. By adding plants from USM A world of plants, waiting areas like departure or arrival halls can be made more cozy and welcoming.

- IT Accessibility
Placing drop-down doors under the bag-shelf at the front of the unit allows for easy IT access.
- Warm or cold light
Haller E is used to backlight the information logo and can also be used to charge devices. With the addition of a USB port.

- ↓ Display
Optional slanted panels allow for space to display magazines. The panels can be lifted and the compartment behind used as storage.
- ↓ Wheelchair accessibility
Reducing the side height of the desk allows for easy exchange with persons in a wheelchair.

USM Haller E

Application Options

A modular structure of your design, either completely or partially equipped with e-Balls and e-Tubes, is connected to a source of electricity. The structure itself conducts the low voltage electricity to the desired location using the e-Balls, e-Connectors and e-Tubes to form a circuit. USB chargers or light sources can be snapped into place in pre-cut recesses. The power supply is drawn from any point near the ground. The power supply cable is attached to a Haller e-Ball, and the power adapter is subsequently tucked underneath the furniture until only the operating switch remains visible. From this point the power supply requires no further cables but rather is integrated into the structure of the furniture.

- 1

Glass Panel
Glass elements can be illuminated throughout.
- 2

Without Metal Paneling
Compartments without metal paneling can be completely illuminated.
- 3

With Metal Paneling
Compartments with metal paneling can be illuminated from the front.
- 4

Compartment with an Extension Shelf
The entire compartment with an extension shelf can be illuminated.
- 5

Drop-Down and Extension Door
Via the "Light When Compartment Is Open" function, the light automatically turns on when the door is opened.
- 6

Angled Shelf
The presentation space is illuminated from the front.
- 7

Floor Lighting
With floor lighting, the light shines at a 25-degree angle under the furniture.
- 8

Ambient Lighting
The light is directed vertically towards the back, illuminating the surroundings with a warm glow.
- 9

e-USB Charger
It can be integrated in the same places as the e-Lights.

e-Elements

- 1

e-Lights
Dimmable, available in
– Warm white 2700 Kelvin
– Cold white 5700 Kelvin
Both with or without the "light at compartment opening" function.
- 2

e-USB Charger
Provides a voltage of 5 volts to the connected device. (Capacity: 6.5 W)
- 3

e-Dummy
Sleek, black e-Dummy element close recesses that are still unutilised. If a piece of furniture should later be supplemented with additional light, using e-Tubes (consuming), which are first equipped with e-Dummy elements, is recommended.
- 4

e-Tube (power outlet)
Tubes with recesses for e-Lights, e-USB chargers or e-Dummy elements that can be easily snapped into place or replaced.

L 350, 1 recess
L 500, 2 recesses
L 750, 3 recesses
- 5

e-Tube (conductive)
The conductive e-Tube serves to conduct the electricity if no inserts are desired in this location. It is available in lengths of 750, 500, 395, 350, 250 and 175 mm.
- 6

e-Ball, e-Connector
To enable the flow of electricity, the ball and connector were refined. The exterior dimensions remain unchanged. The distinguishing feature of the ball is the black insulation ring.
- 7

e-Power Supply
Includes dimmer at the operating switch. Transforms the power supply voltage to 24 volts. (Capacity: 60 W)

Engineered & Made in Switzerland.

Only available in certain countries. Please contact USM Switzerland for availability in your country.

Accessories
for all USM Haller Desks

- 1

Grommet hatch for network access
Hatch for a single power outlet, flushmounted in tabletop. This unit can be mounted in two different positions on the tabletop. Please specify which position you want when ordering.
- 2

Cable management
For the Advanced table type, a cable tray integrated under the tabletop offers storage room and attachment options for all cables and technical components. For the USM Haller Plus, a cable wire basket can be attached.
- 3

CPU holder
Computers in various sizes can be mounted using a simple holding device under the table.
- 4

Link chain
Holds and directs cables to the power source. Flexible and adjustable to various lengths.
- 5

Flat screen support arm
Screens are mounted onto the support arm (VESA standard). Swivel-type with a spherical joint for the screen. Mounting at different heights is possible for screens weighing up to 12 kg.
- 6

Flat screen pivot arm
Screens are screwed to the height adjustable pivot arm using a mounting plate (VESA standard). Continuous height adjustment for screens weighing up to 12 kg.
- 7

Front and side panel
Can be attached under the table to the long side or laterally. For tables with lengths: 2000, 1750, 1500, 1250 and depths: 1000, 750.
- 8

Pivoting pen holder
Provides room for writing instruments and can be discreetly stowed under the tabletop.
- 9

USM Privacy Panels
Can be attached to the long side to ensure individuality and privacy for people working at tables configured as a cluster. H: 350 or H: 700. For tables with lengths: 3000, 2000, 1750, 1500.
- 10

Handle
With slip clutch for synchronous height-adjustment (optional).

Accessories
for USM Haller Desk Plus/ Advanced

- 11

Flat screen support bar
The support bar is inserted into the adaptation points. Up to two screens (max. 2 x 12 kg) can be attached using a mounting plate (VESA standard). Screens can be mounted at different heights; screens can be adjusted with ball joints. Continuously height-adjustable for screens weighing up to 12 kg.
- 12

USB adapter
The adapter is suitable for USB 2.0 and 3.0 ports. It can easily be inserted into the adaptation point. Usable as power supply or for data transfer.
- 13

Lamp peg
An optional lamp peg for easy attachment of selected table lamps. Electrification is possible through the adaptation point.
- Options

11a Flat screen support bar fix

11b Flat screen support bar adjustable
Move forwards or backwards two notches at a time to adjust the viewing distance.

USM Kitos M and E Desk

Each desk (except free-standing) of the USM Kitos M and E family offers integrated smart solutions for electrification.

Why USM Kitos M?

The “M” in its name stands for mechanical spring-loaded height adjustment; adjustment time approx. 1 second with zero energy consumption. This system is more than 10 times faster than the electronic equivalent and has an extremely long operating life.

Why USM Kitos E?

Maximum functionality and captivating design – USM Kitos E unites all requirements in one modern workplace: continuous height adjustability and maximum stability. A distinction is made between fixed and motor-driven legs in the E1, E2 and E3 models.

E1

H: 740
With or without middle traverse

E2 with 1 motor

The table can also be provided with an asymmetrical version of the middle transverse, for extra legroom. (This is not possible with the USM Kitos E / M Meeting.)

* Available with or without middle traverse.

**Available in a GS-Mark tested version with 3 mm table edge radius and the asymmetrical middle traverse.

All measurements in mm.

Accessories
for all USM Kitos M and E Desks

1 Grommet hatch for network access
Hatch for a single power outlet, flush-mounted in table-top. This unit can be mounted in two different positions on the tabletop.

2 CPU holder
The CPU holder allows computers of various sizes to be mounted either under the tabletop facing outwards or on the middle transverse facing outwards or inwards as desired.

3 Link chain
Holds and directs cables to the power source.

4 USM Privacy Panels
Can be attached to the long side to ensure individuality and privacy for people working at tables configured as a cluster.
H: 350 or 700. For tables with lengths: 2500, 2250, 1800, 1750, 1600.

Accessories
for all USM Kitos M and E Desks,
except USM Kitos M Meeting/
E Meeting

5 Flat screen pivot arm
Screens are screwed to the height adjustable pivot arm using a mounting plate (VESA standard). Available for USM Kitos E and M tables: the pivot arm is mounted onto the tabletop using the universal support. Available for USM Kitos M and E Plus: The pivot arm can be inserted into one of the adaptation points with a tube set. Continuous height adjustment for screens weighing up to 12 kg.

6 Front panel
Can be attached under the table to the long side or laterally. For tables with lengths: 1800, 1750, 1600.

7 Material tray
Provides room for writing instruments and can be discreetly stowed under the tabletop.

Accessories
for USM Kitos M Plus / E Plus

8 Flat screen support arm
Screens are mounted onto the support arm (VESA standard) which can be connected directly to one of the adaptation points. Swivel-type with a spherical joint for the screen. Mounting at different heights is possible for screens weighing up to 12 kg.

9 Flat screen support bar
The bracket is inserted into the adaptation points. Up to two screens (max. 2 x 12 kg) can be attached using a mounting plate (VESA standard). Screens can be mounted at different heights; screens can be adjusted with ball joints.

Options:
9a Flat screen support bar fix
9b Flat screen support bar adjustable
Move forwards or backwards two notches at a time to adjust the viewing distance.

10 USB adapter
The adapter is suitable for USB 2.0 and 3.0 ports. It can easily be inserted into the adaptation point. Usable as power supply or for data transfer.

11 Lamp peg
An optional lamp peg for easy attachment of selected table lamps. Electrification is possible through the adaptation point.

All measurements in mm.

Accessories for all USM Kitos classic desks

- 1

Universal support
Is mounted directly onto the tabletop to hold various accessories.
- 2

Flat screen pivot arm
Screens are screwed to the height-adjustable pivot arm using a mounting plate (VESA standard). The pivot arm can be mounted onto the tabletop using the universal support (1). Continuously eight-adjustable for screens weighing up to 12 kg.
- 3

Cable duct
A black aluminum cable duct section, with lids that fold open on both sides, to integrate power strips and cables. The table depths can thereby be expanded to the EU standard of over 800 mm. For tables with lengths: 1800, 1750, 1500, 900.
- 4

USM Privacy Panels
Can be attached to the long side to ensure individuality and privacy for people working at tables configured as a cluster.
H: 350 or H: 700.
For tables with lengths: 1800, 1750, 1500.
- 5

Link chain
Holds and directs cables to the power source.
- 6

CPU holder
Height is adjustable width can be varied using a Velcro band. This allows differently sized computers to be installed.
- 7

Cable wire basket
For the cable management a cable wire basket can be used. It is hung under the tabletop out of sight.
- 8

Material tray
Provides room for writing instruments and can be discreetly stowed under the tabletop.

*Not available in glass.
